Weekly Communication

September 27, 2021

This email is part of a weekly communication series from the CCSQ Data and Analytics team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- Communications Call – Thursday at 1:00pm ET
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

Communications Call –Thursday 1:00pm ET

Please join us **Thursday at 1:00pm ET** for Communications Call, which is part of our bi-weekly call series designed to educate the CCSQ Data & Analytics user community. Our agenda for this call will be the following:

- General Announcements (CCSQ Data Camp & HCQIS_Data Mailbox Announcement)
- System Announcements & Data Source and Usage Updates
- Special Focus Demo: SAS Viya Execution Plans Review & Batch Processing Macros

Please reach out to our team if you have not yet received an invitation.

CDR Data Issues Updates

The below list includes updates on current data issues within the Centralized Data Repository (CDR). Please monitor the [CDR Known Issues Log](#) for the latest statuses and targeted resolution dates.

Schema Name	Current Status
resource_hqr_prs	The hlth_serv_provider table in this database currently has an issue with the rural/urban indicator. The HQR team is working to provide accurate data in this column.
csat_2, csat_5	There is a current data issue with the CSAT 'bene_death_dt' column where new dates of death are not being updated. The CSAT team has corrected data for Part A and for Part D and is currently re-running the data for Part B to resolve this issue. This issue is related to the recently identified issue with the PRS beneficiary merge process.
resource_hqr_prs_supplemental	<p>The Beneficiary merge code for PRS was found to have an issue where it isn't updating existing records and new data isn't being loaded properly into PRS. This was identified with death data originally sourced from BIC.</p> <p>The following tables are impacted:</p> <ul style="list-style-type: none"> • resource_hqr_prs_supplemental.beneficiary • resource_hqr_prs_supplemental.bene_cross_reference • resource_hqr_prs_supplemental.entitlement_reason • resource_hqr_prs_supplemental.bene_migration • resource_hqr_prs_supplemental.bene_edb_mbi • resource_hqr_prs_supplemental.coverage <p>The HQR ADO is working to correct this merge code and pull anything that was missed since Nov 2020.</p>
qmars	There is an issue with QMARS data where the count of appeals in the CDR differs from the QMARS system. The QMARS ADO is working to investigate the issue and determine a resolution. Once the QMARS ADO corrects the data issue, the DAMOD team will pull the corrected data into the CDR.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 9/19/2021 – 9/25/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

CDR Hive Schema
nch_part_a
nch_part_b
beneficiary_data
provider_pmi_data
resource_hqr_prs
resource_hqr_prs_supplemental
nppes
csat_2
csat_5
public_data (drug data)
public_data (zip codes)
quality_measures_hqr_data_form
quality_measures_hqr_char_abst
provider_hqr_nop
quality_measures_hqr_ecqm
resource_hqr_sec_admin
quality_measures_hqr_val
quality_measures_darrrt_qii
healthcare_service_qmars_ng

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a [Request Form](#) and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at HCQIS_Data@hcqis.org.

Knowledge Base Article of the Week: How to Stop All Hive Jobs Spawned by Interactive SAS Sessions

This week's Knowledge Base article provides users the importance of stopping all Hive jobs at the end of a SAS programming session. If Hive jobs are not stopped, they will continue to run for hours or even days until they timeout, and can occupy large portions of your queue in SAS Viya. Check out this article [here](#) on Confluence for best practices, instructions, and related articles.

Important Dates and Links

Upcoming key dates:

- Communications Call – September 30th at 1:00pm ET (see agenda above)
- Communications Call – October 14th at 1:00pm ET
- Introduction to CCSQ Data & Analytics – October 18th at 3:00pm ET
- CCSQ Data Camp – October 20th and 21st
- CAP & CDR Scheduled Maintenance Event – October 22nd at 8:00pm ET

Please note these helpful quick links below, pointing you to some key spaces on our CCSQ Data & Analytics internet-facing space on Confluence:
