Weekly Communication

January 24, 2022

This email is part of a weekly communication series from the CCSQ Data and Analytics team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- Communications Call – This Thursday
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

Communications Call This Thursday

Our first Communications Call of 2022 will be held **this Thursday, January 27th, at 1:00pm ET**. During this call, **special guests from the MDM Team** will join to walk through the new **MDM data changes**. We will also cover **new user experience enhancements** to increase collaboration and information sharing within the user community. If you have not received the invitation, contact us using the information below!

CDR Data Issues Updates

Schema Name	Current Status
beneficiary_data	The BIC team has notified that CDR/ BIC Data Lake only contains a subset of all the tables available in Beneficiary System. Tables not available in CDR but listed in BIC Data dictionary can be added based on a business need for a table to be made available.
qmars	There is an issue with QMARS data where the count of appeals in the CDR differs from the QMARS system. The QMARS ADO is working to investigate the issue and determine a resolution. Once the QMARS ADO corrects the data issue, the DAMOD team will pull the corrected data into the CDR.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

Please monitor the CDR Known Issues Log for the latest status and targeted resolution date(s).

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 01/16/2022 – 01/22/2022. For specific refresh dates of each source, please reference the CDR Data Catalog on Confluence. The following sources were refreshed:

CDR Hive Schema
• assessment_iqies
• provider_iqies
• resource_ref_codes.asc_hcpcs_view
• nch_part_a
• nch_part_b
• provider_pmi_data
• beneficiary_data
• resource_hqr_prs
• resource_hqr_prs_supplemental
• quality_measures_darrt_qii
• quality_measures_hqr_data_form
• quality_measures_hqr_char_abst
• provider_hqr_nop
• quality_measures_hqr_val
• quality_measures_hqr_ecqm
• resource_hqr_sec_admin
• healthcare_service_qmars_ng

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a Request Form and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR.

Knowledge Base Article of the Week: Hive Execution Plans

This week's Knowledge Base article provides users five best practices when you are executing your Hive sessions. These include the following:

1. Checking Hive Usage
2. Writing SQL
3. Reviewing and Testing the Execution Plan for SQL
4. Checking Cluster Use
5. Executing SQL

Check out this article here on Confluence for important notes and step-by-step instructions.

Important Dates & Links

Upcoming Events and Key Dates:
