CCSQ Data & Analytics Weekly Communication

This email is part of a weekly communication series from the CCSQ Data and Analytics team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings. This week's email contains information and updates on the following topics:

- CCSQ Support Central Demo
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

CCSQ Support Central Demo

During the previous Communications Call on February 10th, the CCSQ Support Team responsible for the new CCSQ Support Central portal joined the call to provide a demo of this new ticket creation and ticket

monitoring portal. For those interested in watching the demo, please find the recording and meeting materials [here on Confluence](#). The link to the portal can be found at the bottom of this email.

CDR Data Issues Updates

| Schema Name | Current Status |
|------------------|--|
| beneficiary_data | The BIC team has notified that CDR/ BIC Data Lake only contains a subset of all the tables available in Beneficiary System. Tables not available in CDR but listed in BIC Data dictionary can be added based on a business need for a table to be made available. |
| qmars | There is an issue with QMARS data where the count of appeals in the CDR differs from the QMARS system. The QMARS ADO is working to investigate the issue and determine a resolution. Once the QMARS ADO corrects the data issue, the DAMOD team will pull the corrected data into the CDR. |
| qmars | Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO. |

. Please monitor the CDR [Known Issues Log](#) for the latest status and targeted resolution date(s).

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 02/05/2022 – 02/12/2022. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

| CDR Hive Schema |
|---|
| <ul style="list-style-type: none"> • ddps_part_d • public_data.fda • public_data.zip_codes • nch_part_a • nch_part_b • provider_pmi_data • beneficiary_data • resource_hqr_prs • resource_hqr_prs_supplemental • quality_measures_darrt_qii • quality_measures_hqr_data_form • quality_measures_hqr_char_abst • provider_hqr_nop • quality_measures_hqr_val • quality_measures_hqr_ecqm • resource_hqr_sec_admin • healthcare_service_qmars_ng |

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a [Request Form](#) and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR.

Weekly Knowledge Base Article: How to Use PROC FEDSQL

This week's Knowledge Base article provides users guidance on how to use PROC FEDSQL. This article provides step by step tips on how to optimize your sessions. Check out this article here on Confluence for important notes and instructions:
