## CCSQ Data & Analytics Weekly Communication

This email is part of a weekly communication series from the CCSQ Data and Analytics team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings. This week's email contains information and updates on the following topics:

- Environment Known Issues Updates
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

### Environment Known Issues Updates

Issue with Known Issues Log Link	Description and Details
<a href="#">SAS Viya Lagging Issue</a>	We have been working directly with users who have been impacted and provided best practices to circumvent the lagging issues. Meanwhile, we are working with SAS Professional Services to analyze the environment to right-size the SAS cluster so that we have sufficient resources to support running user workloads
<a href="#">SAS Viya Poor Performance</a>	File lock issues have not been reported in the past few weeks after we conducted the remounts of the affected organizations' workbenches. Meanwhile, we are actively testing out a configuration change to add to workbenches to avoid this issue in the future, which will be applied in the next maintenance window.
<a href="#">SAS Viya/GitHub Integration Not Working</a>	We are currently working with SAS Professional Services on a hotfix that can be deployed to fix the issue. In the meantime, we have published a workaround within the Known Issues Log that users should leverage in their environments.

## CDR Data Issues Updates

Schema Name	Current Status
beneficiary_data	The BIC team has notified that CDR/BIC Data Lake only contains a subset of all the tables available in Beneficiary System. Tables not available in CDR but listed in BIC Data dictionary can be added based on a business need for a table to be made available.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

Please monitor the CDR [Known Issues Log](#) for the latest status and targeted resolution date(s).

## CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 03/06/2022 – 03/12/2022. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

<b>CDR Hive Schema</b>
------------------------

- ddps\_part\_d
- qmars
- health\_plan
- nch\_part\_a
- nch\_part\_b
- provider\_pmi\_data
- beneficiary\_data
- resource\_hqr\_prs
- resource\_hqr\_prs\_supplemental
- quality\_measures\_darrt\_qii
- quality\_measures\_hqr\_data\_form
- quality\_measures\_hqr\_char\_abst
- provider\_hqr\_nop
- quality\_measures\_hqr\_val
- quality\_measures\_hqr\_ecqm
- resource\_hqr\_sec\_admin
- healthcare\_service\_qmars\_ng

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a [Request Form](#) and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR.

## Weekly Knowledge Base Article: How to Save Zeppelin Notebooks

The CCSQ Data & Analytics team conducts backups for Zeppelin notebooks on a daily basis, but if users want to save their notebooks more often, this article provides the guidance and instructions.

Access the instructions here:
