info Planned Activity

Uninstall File Cloud

Any FileCloud users that installed FileCloud Drive should have logged out of the FileCloud Drive application and uninstall FileCloud drive by 9am EST March 1, 2024. If you have not please do so immediately. If you have Administrative Permissions to uninstall, please use the following links on instructions.

Windows Computers: [How to uninstall FileCloud Drive - FileCloud Docs - Server](#)

Mac Computers: [How to uninstall FileCloud Drive for Mac - FileCloud Docs - Server](#)

If you do not have Administrative Permissions to uninstall, please reach out to your local help desk to have them uninstall the application.

In this highly accessible session, you'll learn about the process of idea creation from investigation, and discovery to MVP development. 10X is housed within the General Service Administration's (GSA) Technology Transformation Services (TTS) program. Since 2015, the 10X program has applied the private sector start-up investment model to government-funded technology initiatives that solve big problems for the public. 10X has developed an open crowdsourcing platform for big ideas with the help of technology and nurtured investment to deliver scalable innovations. This will be an interactive session.

Our guest presenters are **Will Cahoe**, Communications and Outreach Lead, 10x and **Aleida Fernandez**, Communications Contractor, 10x.

What you will learn:

Action Required:

- Brief overview of 10X and process
- Innovative open-government collaboration & funding model
- Review key impactful initiatives & technologies
- Focused case study projects; Centralized online Paperwork Reduction Act Guide & US Wed Design System and other technology projects that focus on ensuring equity in the delivery of government digital services.
- How you can submit your ideas
