

QualityNet Portal

QualityNet | QNP

Established by the Centers for Medicare & Medicaid Services (CMS), QualityNet (also referred to as the QualityNet Portal (QNP)) provides healthcare quality improvement news, resources and data reporting tools and applications used by healthcare providers, hospitals, physician offices, and others for various Lines of Business (LOBs). Among the information that can be found on the QualityNet Portal are measures specifications and definitions, reporting requirements, and program specifications. There are also helpful resources such as reporting dates, webinars, and resources.

All the CMS quality program information provided on QualityNet is organized by provider type into six broad categories of care or healthcare communities: Inpatient Hospitals, Outpatient Hospitals, Prospective Payment System (PPS) Exempt Cancer Hospitals, Ambulatory Surgical Centers, End-Stage Renal Disease Facilities, and Inpatient Psychiatric Facilities.

Video: QualityNet Redesign

This will include links to the user resources for QNP including a Tip Sheet

FAQs

General

<https://qualitynet.cms.gov/>

No, it is a public site and does not require any security credentials to access.

Submitters should open a ticket with the QualityNet Service Desk, attaching any relevant documents. See [QualityNet Content Submission](#) for a description of the process.

The Information Systems Group (ISG) of CMS has directed that content be retained on the QualityNet website for seven years.

QNP is currently following a 2 week release cadence schedule. Please see below for details about each release.

Release Date	Release Version	Description
5/30/2019	HCMS 1.0	Initial release of H-CMS
8/19/2019	HCMS 1.1	2nd release of H-CMS
9/25/2019	QNP 2.0	MVP Release of QNP 2.0
10.08 /2019	QNP 2.0.1	Searching with parenthesis; 404 error; Large payloads & content history; Admin UI login page in IE
10/22/2019	QNP 2.0.2	Update Q&A tool urls; Debug Listserve in prod; Remove published status from dropdown options
11/05/2019	QNP 2.1.0	NGINX error logging; Edit/update file functionality; Large download files to indicate download status
11/19/2019	QNP 2.1.1	Token refresh; Update navigation with 'RP' for HAC; Fix preview link in content associated pages

Need Help?

Don't have a ServiceNow Account? No problem. You can get the support you need through CCSQ Support Central!

CCSQ Support Central: Provides customers with multilevel support. Through [CCSQ Support Central](#) you can create new tickets that directly submit to the CCSQ Service Center and track the status of existing tickets. It also provides access to services and information for:

- Hospital Quality Reporting (HQR)
- Quality Payment Program (QPP)
- Internet Quality Improvement and Evaluation System (iQIES)
- End Stage Renal Disease Quality Reporting (EQRS)
- Electronic Prescribing of Controlled Substances (EPCS).
- QualityNet Support Center

Already have a ServiceNow Account? You can also use the platforms below to get the help you need!

ServiceNow Service Portal:

Intended only for CMS employees and vendor partners. The portal provides self-service options for internal customers to report **Security Incidents**, submit **Service Requests** for tools or services offered to the internal QualityNet community, report an **Incident**, provide **Approvals**, or access internal **Knowledge Base** articles. The portal enables internal customers to track the status of tickets and requires a login. https://cmsqualitysupport.servicenowservices.com/sp_ess

QualityNet Slack: You can send questions/issues to our Slack channels [#help-servicenow](#)

12/04/2019	QNP 2.1.2	Allow preview of nonpublished page and nonpublished content; Show all pages a file lives on under Associated Pages
12/20/2019	QNP 2.1.3	QNP admin caching function change; Payload issue
1/14/2020	QNP 2.1.4	Deployed updated Q&A Tool urls; Multitenancy- Modify AWS lambda function; Scheduling-publish- design
1/28/2020	QNP 2.2.0	Multitenancy- Database updates, creating data services, etc.
2/12/2020	QNP 2.2.1	Remediate Sonar findings; Angular UI upgrade
2/25/2020	QNP 2.2.2	Sonar and 508 defect remediation; Angular UI upgrade for Admin UI; Scheduling publish feature
3/24/2020	QNP 2.2.3	Sonar Quality Metrics, 508 Defect Resolution, H-CMS program by ID/role; Archiving enhancement
4/7/2020	QNP 2.2.4	Sonar Quality Metrics, 508 defects for admin UI, Defect resolution
4/21/2020	QNP 2.2.5	508 Defect Resolution for Admin UI.
5/05/2020	QNP 2.2.6	Update calendar date picker to be 508 compliant in all browsers
5/12/2020	QNP 2.2.6.1	PROD 2 Cutover
5/19/2020	QNP 2.2.7	Q&A Tool updates, Dashes defect, AMI Updates, Confirm pop up to publish button in QNP Admin UI
		PI 11 Production Releases
6/17/2020	QNP 3.0.0	QualityNet Mailer
6/23/2020	QNP 3.0.1	QualityNet Mailer public UI was updated with new HSAG email address
6/30/2020	QNP 3.1.0	QualityNet Mailer enhancements of the public subscription page
7/2/2020	QNP 3.1.1	QualityNet Mailer enhancement so List Admin's email address is masked when sending notifications
7/14/2020	QNP 3.2.0	List admin role enhancement (only able to view lists assigned to their program); List Admin role can accept or reject multiple Subscriber list requests for private lists simultaneously; Flag will be sent to remove sender email address from the To/From fields replacing with the notification list email address; 508 defect resolution for QualityNet Mailer public and Admin UI.
7/28/2020	QNP 3.3.0	Sonar Quality Metrics updates. QualityNet Mailer validation messages. QualityNet Mailer template updates. QNP/QualityNet Mailer public search defect resolution. QualityNet Mailer Admin UI Search enhancement.
8/11/2020	QNP 3.4.0	QNP Admin. UI Publish Defect resolution- resolved content size limitation issue.
		PI 12 Production Releases
8/27/2020	QNP 3.4.1	AMI upgrade.
9/8/2020	QNP 3.5.0	1) Resolve QNP and Mailer related defects: 2376, 2370, 2453 for Edit refresh, list member removal, and list indentation on public site. 2) Mailer List Migrations: perform list migrations to Prod throughout PI12.1 based on the Kanban board entries within the ESS Mailman (EM) Jira Board. 3) Mon goDB and Postgres password updates. 4) Angular 9 upgrade: upgrade to Angular 9 and associated dependencies.
9/17/2020	QNP 3.5.1	List Migration/Onboarding: QNet Notify, QualityNet Analytics, and CART lists were added to Mailer.
9/22/2020	QNP 3.6.0	Mailer usage metrics enhancement (displays successful send and bounce email metrics); implementation of Mailer exporting feature to allow subscribers to create a .csv file; addressed Okta login/timeout for Mailer; and addressed Mailer Admin UI timeout.
10/1/2020	QNP 3.6.1	Configuration changes needed for the QualityNet Analytics list.

QualityNet Sites

QNP website: [QualityNet](#)

QNP Content Submission: [QNP Submission](#)

10/6/2020	QNP 3.7.0	Added the ability for subscriber to engage in 2 way discussion activity for a discussion list; MongoDB and Postgres password updates; cleanup work performed on the CSS for QNP admin UI and HCMS; Burp Suite remediation.
10/8/2020	QNP 3.7.1	Added the QIONet lists for QMARS, FIVS, and DAART to the Mailer and bulk updated the QualityNet Analytics List with an additional 988 Subscribers.
10/20/2020	QNP 3.8.0	Test coverage: implemented test coverage services in ess-hcms-public-ui as part of quality metrics and improvement; Defect resolution with HCMS: implement fix for the session expiration token, which was not updating after confirming the extension; Defect resolution with QNP Admin Token: the token is not changing when the user is located on the Mailing List Details page; and Mailer: enhance the Mailer Admin UI with static text to clarify that UX may be impacted within the Admin UI when using IE.
10/28/2020	QNP 3.8.1	Added the HCAHPS notification list to mailer which included the bulk uploading of 15, 501 subscribers.
11/3/2020	QNP 3.9.0	<ul style="list-style-type: none"> -Resolved multiple 508 accessibility findings. -Set up New Relic alerts for hcms-data & hcms-content-type API. -Added units test for 80-100% code coverage for MailingListsService. -Added units test for 80-100% code coverage for ContentDashboardService & ContentService. -Mailer Timezone resolution: to display date, AM/PM, specific to timezone of logged in user within the Mailer Admin UI.
11/15/2020	QNP 3.9.1	Completed migration of all 10 HSAG (9 notification and 1 discussion) lists from Lyris to QualityNet Mailer.
		PI 13 Production Releases
11/17/2020	QNP 4.0.0	<ul style="list-style-type: none"> -Migration of .org to .gov for QNP and HCMS Production environment -AMI upgrades
11/25/2020	QNP 4.0.1	Updates for Acute Hospitals Care at Home.
12/01/2020	QNP 4.1.0	<ul style="list-style-type: none"> AMI upgrades MongoDB and Postgres password updates.
12/09/2020	QNP 4.1.1	<ul style="list-style-type: none"> Updates for AHCAH : -Waiver Request Submission form failure message update -Waiver request text updates -Tier 2 "none" selection fix.
12/15/2020	QNP 4.2.0	<ul style="list-style-type: none"> -Revise QSP link on QNP homepage to redirect to Confluence page -Update QNP footer from Qualitynet.org -AMI upgrades
12/30/2020	QNP 4.3.0	AHCAH functionality for measures collections, submission, and reporting; AMI upgrades
1/12/2021	QNP 4.4.0	<ul style="list-style-type: none"> -AHCAH Addition of 'Attesting Title' field to capture the job title of the person doing the attesting. - Addition of a new help language at beginning of report measures page - <i>Further, if your hospital/CCN did not discharge any patients this reporting period, please enter "0" when asked about volume and skip question #5.</i> -Fix typo in Validation Error message for missing MBI data. -Fix Exim communication with Core -Update public QNP navigation to point to the new Getting Started content, so that it is up to date with recent changes.

1/26/2021	QNP 4.5.0	<p>-AHCAH – on the Waiver and Measures pages, the forms have been updated so that they retain user entry before submission.</p> <p>-AHCAH – we updated and improved the system error message responses when users enter name, email, number validations that are not correct.</p> <p>-AHCAH – on the Jira side, there is a new Hospital status that can be set called “IJ Review”. While this status should appear to Jira users, the AHCAH page visible to the Hospitals on QNP will still retain a status = “In Progress” even if “IJ Review” status is set in Jira.</p> <p>-Changed subject line on emails to distinguish Tier 1 and Tier 2 for Outlook rule.</p> <p>-The "AHCAH Waiver Approval Date" field will provide quick at-a-glance data on when a Waiver was approved.</p> <p>-QualityNet Mailer – Updated help text on the public QNP Mailer page, so subscribers have more visible instructions to whitelist the domain if not receiving emails.</p> <p>-MongoDB and Postgres password updates for 60 day compliance.</p> <p>-QNP Mongo DB Upgrade to version 4.4.</p> <p>-AMI upgrade.</p>
		PI 14 Production Releases
09 Feb 2021	QNP 4.6.0	<p>-AHCAH – Added filter question to the AHCAH reporting measures form, so that the UI is simplified for submitters with 0 discharges.</p> <p>-Mailer – resolved issue with List Administrators unable to search members with upper case letter in search criteria</p> <p>-Mailer – implemented content updates to the automated QualityNet Mailer templates for improved user experience (e.g. added information about whitelisting mailer domains, improved directions for confirming email address when subscribing).</p> <p>-Standard bi-weekly AMI upgrade</p>
2/19/2021	QNP 4.6.1	Used to bring up all six nginx containers
2/23/2021	QNP 4.7.0	<p>-AHCAH – “Other” Title value is not retaining after page refresh on Waiver</p> <p>-AHCAH – Question 5 File info is not retaining after page refresh on Measures</p> <p>-AHCAH – reCAPTCHA and validation error messages not clearing after Measure Submission scenario</p> <p>-Mailer – implemented content updates to the automated QualityNet Mailer templates for improved user experience along with Help Desk email address</p> <p>-Mailer – updated Prod Mailer lists email address "From" name to display a shortened list descriptor name instead of the elongated description</p> <p>-Bi-weekly AMI upgrade (note: due to some issues with AWS moving slowly, we manually brought up Mailman core; we still need to apply AMI updates for Mailman, which will be completed Wed evening)</p>
3/10/2021	QNP 4.8.0	<p>-Mailer – modify language to provide more specific language/content for clarity on the “disabled due to email bounces” Mailer template</p> <p>-Mailer (QNP) – Update Language on listserv-success page when user signs up for a list to reiterate instructions for whitelisting the Mailer demo to better ensure receipt of the Mailer notifications for that list</p> <p>-508 resolution stories</p> <p>-Added test coverage for MailMan Lists in ess-hcms-public-ui (Sonar Quality Gate metric coverage improvement)</p> <p>-Bi-weekly AMI upgrade</p>

3/23/2021	QNP 4.9.0	<p>-AHCAH - update text for Reports Measures Question 1 from "Has your hospital/CCN discharged any patients this reporting period?" to "Has your hospital/CCN discharged any patients under the AHCAH waiver this reporting period?"</p> <p>-Mailer - upgraded Mailman from 3.3.1 to 3.3.2 – this removes the alpha /numeric token/characters from the welcome email subject line to provide a more user-friendly experience with subject lines.</p> <p>-Mailer – enable List Admin with the option to make a member a poster to the list.</p> <p>-Consolidated HCMS Admin UI into QNP Admin UI, so that there is only one codebase and login page to maintain.</p> <p>-508 resolution stories</p> <p>-MongoDB and Postgres password updates</p> <p>-Bi-weekly AMI upgrade</p>
4/6/21	QNP 4.10.0	<p>-AHCAH – corrected the format for the Reporting Measure Period Submission Date when viewing the information within IE</p> <p>-Mailer – implemented DKIM/keypair changes to support whitelisting changes</p> <p>-Mailer – preparatory database stories for list categorization</p> <p>-QNP specific maintenance/updates:</p> <p>QNP - AMI Upgrade (biweekly standard update) Remove docker volume from efs mount script Gateway/F5: Update the urls on Angular config in public-ui. Gateway/F5: Removal of QNP-APIGateway and use the F5 load balancer URL Add logging-framework artifact to package.json Remove pipeline for the HCMS Admin UI HARP SSO updates: Update Route guard, Interceptor, logout to use Javascript SDK Content Types & Content Manager API: "successfully" misspelling** Update nginx resolvers (DevOps/Ventech identified that the resolver IPs in Nginx need to be updated for HARP and QNP to resolve intermittent network api issues originating on March 29)</p>
4/20/21	QNP 4.11.0	<p>-AHCAH: add phone extension field; ESSTRANF-2782 add a field for submitters to confirm email address</p> <p>-QNP Admin UI: (note - this update was applied by CMS OIT in Prod on 4 /16)</p> <p>Request to extend QNP OKTA token duration to 30 minutes – Extends the Admin UI Login duration from 15 to 30 mins.</p> <p>-Mailer: implementation of the new QNP public UI category display for all Mailer lists; list categorization will better present the lists and enable potential Subscribers to more easily navigate list selections.</p> <p>Mailer Tags - Mailman Admin API Mailer - UI changes for category display Mailer - Mailman Public api story</p> <p>-QNP DevOps/Maintenance:</p> <p>Add retention policy to ess-qnp-content-access S3 buckets Refactor userdata and efs scripts for HCMS/QNP Implement Program Origin field validations in API level like we have in UI QNP - AMI Upgrade (R4.11.0) – standard bi-weekly update</p>
		PI 15 Production Releases

5/4/21	QNP 4.12.0	<p>QNP DevOps/Maintenance:</p> <p>Create QNP Banner: the banner will run on the QNP Public page (this will be initially used to recommend using supported browsers Chrome, FireFox, and Edge as opposed to IE).</p> <p>Update pagination logic to consume API's on QNP screens and API: Add pagination to QNP endpoints: updated logic to improve QNP Admin pagination.</p> <p>Upgrade Node Packages: standard I&P DevOps maintenance update</p> <p>QNP - AMI Upgrade (R4.12.0): standard bi-weekly upgrade.</p>
5/18/21	QNP 4.13.0	<p>-QNP:</p> <p>HARP Single Sign-on (SSO) integration with QNP Admin: QNP Admin UI (for Content Management and Mailer Admin UI) is now integrated with HARP SSO.</p> <p>Spike: "Recently Edited" page not loading</p> <p>-AHCAH:</p> <p>AHCAH – Web Application Firewall (WAF) blocking error message: QNP now provides a custom error (with code) that displays in the UI when user encounters WAF blocking mode error, so the user can provide error directly to Service Center for immediate unblocking.</p> <p>-Mailer:</p> <p>Resolved the "ordering" display of QNP Admin pending requests on the Subscription tab for Email confirmation and Held message records.</p> <p>-QNP DevOps/Maintenance:</p> <p>Spike: Resolve/apply monitoring for Latency Issues in QNP Public Prod</p> <p>ajv upgrade</p> <p>Merge New Relic PRs and test NewRelic integration</p> <p>Mailer - Bounce queue cleanup (PI15.1)</p> <p>MongoDB and Postgres password updates (PI15.1, 5/18/2021 Release)</p> <p>QNP - AMI Upgrade (R4.13.0): standard bi-weekly upgrade.</p>
5/19/21	QNP 4.13.1	<p>Corrected sorting order display. Verified the sorting order is now displaying in correct order for content types and verified previous Mailer Pending request page sorting order as well.</p>
6/3/21	QNP 4.14.0	<p>QualityNet Mailer:</p> <ul style="list-style-type: none"> • Pagination updates: modified QNP Admin UI to display results in Paginated format for Held Messages tab, Email Confirmation tab, Subscription tab, and bounced email results • Members tab: revised terminology to display "Admin" instead of "Owner" • Pending requests page: added the List name to the page, which hyperlinks to the List details • Created summary "one sheet" that efficiently describes the List Admin enhancements implemented for this current release (we designed this as a reusable marketing template for continued use each Release) • Updated List Admin User to reflect the latest changes; posted to Mailer Public Confluence page • Created detailed Bounce FAQ documentation; posted to Mailer Public Confluence page <p>DevOps and Technical improvements (non-UI):</p> <ul style="list-style-type: none"> • Mailer: Change CloudFormation template to merge mailman services – improves Mailer performance and removed duplication challenges we were experiencing on our side • Mailer: Splunk Integration with Mailman and Exim Logs – improves Mailer error diagnosis and tracing • QNP - AMI Upgrade (R4.14.0) – standard bi-weekly AMI upgrade

6/15/2021	4.15.0	<p>QNP:</p> <ul style="list-style-type: none"> • QNP Admin UI (authenticated login site) updated with newly designed format and branding to reflect a QNP workspace for QNP Content Management and Mailer Admin management. Users will notice the new logo/branding and color schema; all existing functionality and user interactive experience remains the same. <p>QualityNet Mailer:</p> <ul style="list-style-type: none"> • Corrected the following defect within History tab: for lists with 20 or more pages of bounce emails, the pagination display was running off of the popup modal. • Corrected the missing validation error for Add Member page on QNP Mailer Admin for the HARP ID field. • Corrected the following defect: when adding Owner to Lists, the List would disappear from view within the Manage Lists page <p>QNP DevOps/Maintenance:</p> <ul style="list-style-type: none"> • Performed Angular Upgrade to Angular 12. • Completion of Bi-weekly AMI upgrade. • Implemented QNP public/admin application latency improvement – in some cases, pages were randomly taking up to 5 seconds to load, the improvement reduced to 2 seconds or less.
6/29/2021	4.16.0	<p>QNP:</p> <ul style="list-style-type: none"> • QNP Admin UI (authenticated login site) resolved left side navigation loading style with the new rebranding/graphical display • Resolved issue when user clicks on refresh in view Content History page and the header info had been disappearing • Resolved issue for Archive button displaying in the create content section • Added pagination to QNP News and Search Page to improve user experience and navigation <p>QNP DevOps/Maintenance:</p> <ul style="list-style-type: none"> • (QualityNet Mailer) Resolution to reoccurring Exim error (Mailer maintenance): Exim was intermittently failing to open the configuration file from EFS, which blocked mail from being sent. The solution was to load a generalized configuration file in the docker image and put environment specific data in environment variables • (QualityNet Mailer) Resolved issue with the Loading spinner background (“Loading...Please Wait” function) not covering the entire screen • Completed Bi-weekly AMI upgrade
7/13/2021	4.17.0	<p>QNP/Mailer:</p> <ul style="list-style-type: none"> • Update public data api query for news articles; query checks the draft /publish status of the News Articles on the QNP site to ensure proper publication • (QualityNet Mailer) Resolved visual display for large email body presenting outside of the pop up modal <p>QNP DevOps/Maintenance & Security:</p> <ul style="list-style-type: none"> • Completed Bi-weekly AMI upgrade • Implemented 60-day MongoDB and Postgres password updates • Resolved Burpe Suite findings for: External service interaction (SMTP), Cross-site scripting (stored), and Input returned in response (stored) • Verification of HCQIS AWS AMI Update Notice: AWS CLI to VERSION 2.X in SBX, TEST and IMPL
		PI 16 Production Releases

7/27/2021	4.18.0	<p>QNP/Mailer:</p> <ul style="list-style-type: none"> Created new page and updated text to reflect summary/overview for the rebranding of QNP Admin UI to the QualityNet Workspace <p>QNP DevOps/Maintenance & Security:</p> <ul style="list-style-type: none"> Nodejs OSS upgrades for PI-16 QNP - AMI Upgrade - R4.18.0

08/29/2023	QNP 6.36.4	AMI upgrade, misc Mailer update

Headless Content Management System

ESS implemented the Multi-tenancy Feature for the Headless Content Management System (H-CMS). This feature enables ADOs to integrate with H-CMS as part of their own work effort (to create their own Programs, metadata, etc.) if they have a need for a content management system.

H-CMS was first released in May 2019 and is now available for integration – for any questions regarding H-CMS integration or for a demo please reach out to ServiceCenterSOS@cms.hhs.gov.
